Join Me I am a computer nerd and I love to write, give presentations, and deliver insightful computer tips and tricks. There is so much to know about computers, and I love to share my knowledge. This blog is a great place to get some Free information and learn tips about your computer. Join me, and I hope you will enjoy what we discuss here.Q: Indexers on generic lists? I'm trying to define a class that stores a collection of generic lists and iterators, but I'm getting this error: The best overloaded method match for

'System.Collections.Generic.IEnumerable.GetEnumerator()' has some invalid arguments I can use an Indexer to implement the method, but would like to know if there is a built-in solution? public class Collection : IEnumerable { private readonly List \_list; private readonly List \_predicates; private readonly List \_selectors; private readonly List \_filters; public Collection(List list, List preds, List selects, List filters) { \_list = list; \_

## VLC Media Player

VLC Media Player is a media player for Windows and GNU/Linux. In addition to playing media files, VLC also has an extensive media library (which can be accessed from the Media sidebar). VLC can play almost any media file, from the Windows Media Player. File plays with VLC software are displayed as you would expect: some include Kodi media player (formerly known as XBMC). XBMC is a cross-platform media player and app store that streams and plays media from various sources. Initially released as XBMC Media Center, Kodi has since grown into its own software.Effects of carnosine on the uncoupling of oxidative phosphorylation and energy transduction in isolated rat liver mitochondria. Carnosine (beta-alanyl-L-histidine) increased the respiration rate and oxidation of glutamate of rat liver mitochondria and restored the coupling of oxidative phosphorylation to ATP synthesis. Carnosine (100 and 300 microM) increased the respiration rate (less than 10% of the value of the positive control) and the ATP synthesis (less than 10% of the value of the positive control). Carnosine (1 mM) increased the respiratory control (49.5 +/- 4.4%) and the coupling of oxidative phosphorylation to ATP synthesis (38.8 +/- 0.5%). Carnosine (10 and 100 microM) reduced the adenylate kinase activity in isolated mitochondria but stimulated the ADP:ATP-exchanger.1. Field of the Invention The present invention generally relates to a lubricant composition and more specifically relates to a lubricant composition comprising a base lubricant with a releasable additive. 2. Description of the Related Art Many lubricants used in internal combustion engines, automatic transmissions, and other components of modern vehicles operate under demanding conditions. If the lubricant composition contains a solid, unreleasable additive, upon operation of the engine or transmission, the additive may be deposited onto the surfaces of the engine or transmission, such as a piston, a shaft, a gear, or the like. Over time, the additive may accumulate onto the surfaces of the engine or transmission, leading to decreased performance and increased wear on the surfaces of the engine or transmission. In addition, since some solid additives are more reactive or corrosive than others, the additive may wear at a faster rate than the engine or transmission and cause 3e33713323
