Storage: Features AutoCAD has a large number of tools for drawing. Unlike the Windows versions of AutoCAD, the Mac versions do not have a feature-by-feature comparison of the Mac version to the Windows version, only an overview of the features. AutoCAD is powered by a document editor known as the Drawing Toolbar and is written in the standard AutoLISP programming language. AutoCAD is available for the macOS, macOS Mojave, macOS Catalina, Windows, and Windows 10 operating systems. Automation and customization AutoCAD is available with a variety of APIs, allowing customization and automation of drawing programs. These include: Visual LISP (Visual LISP, VLISP) Visual Basic (VB) ObjectARX (ObjectARX) Automation and customization APIs available for AutoCAD include: AutoLISP programming language with the AutoLISP interpreter Visual LISP Visual Basic ObjectARX (Autodesk ObjectARX) AutoCAD's application programming interface (API) is called "Application Programming Interface" or "API". This is the same term as the API for the AutoCAD MapServer. It is the standard, cross-platform way of calling a drawing application. The API is similar in concept to the MAPI (Microsoft Messaging Application Programming Interface) used in Internet Explorer for sending e-mail messages. AutoCAD's drawing application programming interface is designed to be as open as possible and is developed using open standards (ISO), allowing it to be easily used from multiple sources. The most common way of calling AutoCAD is via its API. In-App purchases AutoCAD's in-app purchases allow you to buy templates, add-ons and other items used to build or create a drawing. You may add items through the My Workspace option in the menu bar or from the Add/Edit menu. You may then create a workspace to store your In-App purchases. You may only have one workspace. To view items you have purchased, use the My Workspace menu option. This displays the workspace and your In-App purchases within the workspace. If you are already in the AutoCAD drawing, the workspace is stored in My Workspace/In-App Purchases. AutoCAD stores the original purchased and locked-down versions of your In-App purchase items in the Purchases folder in My 5b5f913d15
