
Les Mills Grit Series Torrent 42 PORTABLE

Category:Les MillsQ: How to create a view with tables In SQL Server Management Studio in SQL Server I have a View which contains a column that I want to format as two other tables in the database. How can I do that? The columns are, Table 1: Column 1 (formatted as 1.) Table 2: Column 1 (formatted as Table 1 Column 2.) Table 3: Column 1 (formatted as Table 2 Column 2.) Table 1: Column 2 (formatted as 1.) Table 2: Column 2 (formatted as Table 1 Column 2.) Table 3: Column 2 (formatted as Table 2 Column 2.) View: Column 3 (formatted as 1.) I need to format Table 1, 2, and 3 into Column 3 like this: Any help is greatly appreciated! A: I'm guessing the view is based on a table you wish to format into columns of the view? If so, you can use PIVOT (Pivot_CTE) like this: DECLARE @CASE_NAMES varchar(MAX) = STUFF((SELECT DISTINCT ' CASE WHEN col1 = "' + Column_Name + "' THEN "table1" ELSE "table2" END' FROM your_table FOR XML PATH(''), 1, 1, '); SELECT @CASE_NAMES If you get NULLS you will have to check and replace them... Q: Why is this program giving me two different types of errors? I am a beginner programmer, so this might be an easy question, but I'm having some trouble with my code and I don't know why it's giving me two different errors
