With all the available features in Photoshop, it's easy to spend too much time learning how to use it. In this book, I focus on providing a foundation of Photoshop skills. The aim is to give you the knowledge of basic and intermediate Photoshop techniques, some of which can help you get by on your own.

Photoshop Elements One of the most popular Photoshop alternatives is Adobe Photoshop Elements, which includes the design tools that I discuss in Chapter 8. Drawing and Painting You know that very first image of the Buddha or the girl with the long hair and the braided ponytail that I used as examples in Chapter 7? Most probably, you drew it. You may even have started drawing and painting in elementary school. Drawing and painting provide a fun, creative outlet that enables you to work on your own without resorting to the use of masks, reflections, or other digital effects that make up the bulk of the processes in this book. Here are a few things to keep in mind before you start drawing and painting: You can draw and paint in many ways. Some of the very first artworks were done using crayons,

pencils, pastels, charcoal, charcoal pencils, pastels, oil paints, oil pastels, markers, graphite, and watercolors. With software applications, you can utilize photo editors, graphic design programs, and word processors. You should use whichever tools and methods work best for you. Let your creativity take the lead. You don't need a lot of expensive supplies to get started. You can draw with just a regular paper and the simplest tools, such as a pencil or pen. Paint with watercolors, pastels, or tempera paints. You can even use ordinary household items such as a pot and brush, or even scraps of paper. Keep at it. Pick up a book or the Internet to gain new inspiration. Create your own digital scrapbook to share with your family. If you're just starting out, you won't learn much by seeing someone else's work, but simply copying is a good way to learn. Another reason to keep at it is that if you become a master of one method, you can then experiment with other methods and techniques — which is why this book includes my own sketches, for example. Tonal painting Tonal painting is essentially what it sounds like: You paint a portion of the image with one type of color — the

VOD WMT NEW YORK (TheStreet) -- The more that  
Congress talks about the U.S. government's \$1.2 trillion fiscal  
cliff agreement, the more it becomes clear what the impact is  
going to be on individuals and corporations in terms of how  
they handle their financial situations. Simply put, if Congress  
passes an annual budget bill, signed by the president, that can't  
be meaningfully altered by the U.S. House of Representatives  
and Senate, then the federal government will not go over the so-  
called fiscal cliff. But if an annual budget bill that can be  
altered by the U.S. House and Senate can be passed, or if  
Congress passes another appropriations bill, then the crisis  
means the government will become shut down. In other words,  
if Congress acts before the 12/31/12 deadline, and the  
agreement is altered, or if Congress does not pass a budget in  
time or the president issues an executive order to move forward,  
then we will all be plunged deeper into the abyss. With that in  
mind, it's clear from the terms of the agreement that no one in  
Washington, including the president, wants a shutdown. But no  
one is willing to actually lose his or her job -- hence the fast-  
paced horse-trading and negotiating that has been going on

---

since last week's extension deadline. The fiscal cliff agreement will likely include provisions that extend the George W. Bush-era tax cuts and that may include even a slight extension of the payroll tax cut. But an even bigger question is, exactly how much do the other parties to the negotiations want? The answer to that question becomes even more important as the numbers get crunched, but right now the Obama administration wants to avoid any potential stock market plunge if they were to sign a bill that includes the fiscal cliff. So that means they're willing to accept \$1 trillion or more in cuts over the next 10 years from the current 2012 budget. On Thursday, House Speaker John Boehner acknowledged that those type of cuts, if they were to be signed into law, would

The potential for a multidisciplinary approach to the management of elderly patients with acute gastrointestinal bleeding. To assess the potential for an interdisciplinary approach to the management of elderly patients with acute gastrointestinal bleeding. Elderly patients with acute gastrointestinal bleeding represent a relatively common yet challenging clinical problem. The high mortality in this population is related to the common occurrence of coexisting comorbid conditions. Despite this, elderly patients are underrepresented in randomized controlled trials of treatment of acute gastrointestinal bleeding, and have received few studies

of outcome improvement. A prospective study of elderly patients with acute upper and lower gastrointestinal bleeding was undertaken at a tertiary referral center in the United Kingdom. Patients were assessed by the following investigators: an upper gastroenterologist and a hematologist. Standard management and investigations were used. Initial management of the patients was re-assessed at the time of intervention. A total of 137 elderly patients (mean age 78 years) were followed up for a mean of 13 (range, 1-60) days after intervention. Endoscopic therapy was successful in 73 patients (52.5%). Initial management was altered in 27 patients (20.8%). Interventions were repeated in 16 patients (12.2%). In the univariate analysis, interventions were more likely to be successful in patients with an aPTT ratio  $\geq 1.5$  (p = 0.001). In the multivariate model, only aPTT ratio  $>1.5$  was an independent predictor of an intervention (p = 0.002). Multiple interventions were successful in 37.8% of patients. This was associated with successful initial management in only 10.5% of patients. Interventions were associated with significantly better survival in the univariate analysis (p = 0.008) but this effect was no longer present in the multivariate analysis. The results of this study suggest that elderly patients with acute gastrointestinal bleeding may benefit from a multidisciplinary approach to their management. This may translate into more successful initial management and a better outcome.
