In addition, there are native AutoCAD archives for the Windows operating system. Raster graphics editor AutoCAD has a native raster graphics editor, or RGE, that allows

editing and outputting raster images. In addition, RGE can output vector images into some DXF, DWG, 3D DWG and FBX formats. 3D AutoCAD also includes a full 3D modeling environment, or 3D. AutoCAD Map 3D AutoCAD Map 3D is a version of AutoCAD that is developed for use with AutoCAD Map, a map creation and editing software. In addition, AutoCAD

Map 3D includes a number of tools for creating map data (such as GIS data), including ArcPad and ArcPad Lite. The tools are contained within a separate Window, called the toolbox. The map data can be output to a variety of formats including AutoCAD Map Services, AutoCAD Map Publisher and AutoCAD Map files. AutoCAD Map Publisher

AutoCAD Map Publisher allows creation and output of map data as a number of AutoCAD Map 3D formats. The software includes several components, including the ArcPad and ArcPad Lite, a raster graphics editor and output tools, a coordinate conversion tool and a text tool. Vector 3D AutoCAD Vector 3D is a version of AutoCAD that is developed for use with AutoCAD

3D, a version of AutoCAD with 3D capabilities. In addition, AutoCAD Vector 3D includes a vector graphics editor and a coordinate conversion tool. Advanced text and line AutoCAD offers a variety of advanced text and line editing features including shape text (AutoCAD 2007 and later only), curved text, text objects and paragraph text. 3D text AutoCAD 3D text

Markup Assist was introduced in the Autodesk Academy to help designers and drafters. It can automatically integrate two-dimensional (2D) or three-

dimensional (3D) information into AutoCAD models and other applications. It's now available to AutoCAD users. The Autodesk Academy has a new course, AutoCAD Markup Assist, which shows you how to use Markup Assist in AutoCAD. The course is free. Screen Scrolling: Simplify your work by moving your document to a view that lets you see more detail on the

screen. Group commands have been enhanced to integrate with the most frequently used toolbars. There's a new cursor appearance for screen scrolling. DontArrow: Draw lines at precise angles from the object corner that are perpendicular to the drawing axis. The DontArrow command provides a convenient method to draw lines that match the direction of

the current line you are drawing. [video] Markup Assist Import: Speed up your design process by importing paper drawings directly into AutoCAD. (video: 1:50 min.) Feedback and messaging for design reviews have never been easier. Object-oriented drawing features are now available for importing from paper drawings, PDFs, or other external files. Use the Review

feature to send e-mail messages to your team, or collect the team's feedback in a single document, such as a PDF. Use the Markup Assist Import task to import drawings from a PDF, paper drawing, or another CAD file, and add, correct, and review changes automatically. [video] Multi-select commands: Control multiple objects simultaneously with a single

click. The new multi-select commands let you easily make selections on the screen. The selection handles in the multi-select toolbox move across your active objects.
