===== The game will go live on February 5, 2019. ===== A young man named Tosh, who made the wrong choice, and a woman named Chisa make a stop in the Far West, where a new world awaits. There, players will take on the role of a lord who is currently wandering in the place of origin, and find their way home. They'll fight against powerful enemies, explore various lands, and directly connect with other users through an online system. All weapons, armor, and magic can be freely combined and the battlefield is big and open, so you will discover vast and mysterious worlds. Archetypal fantasy action RPG gameplay is combined with unique elements such as the cultivation of the character, the action of asynchronous online play, and intricately designed battles, making this an action RPG that is unlike other games. In addition to the gameplay, the game also has a story with a deep and complex structure written by the famed novelist Yuusuke Murata, and is also filled with powerful characters and a cast of unforgettable characters that you'll meet while exploring the lands. Similar to a movie, the various scenes of the story are experienced through the eyes of your character, and the narrative will unfold as you progress through the game, making it a story with complex layers that will fully convey the dramatic and exciting feeling of the online RPG. The story and characters are still being developed, and are planned to be completed by the end of 2019. In this paper we consider the case of countably complete theories as logics, and study those models of arithmetic in which every set is measurable. We show that the class of such measures is closed under countable intersections, but may be uncountably infinite. We also give a model-theoretic characterisation of those sets for which it is true that every proper ideal is countable.' --- Albert Visser Department of Mathematics University of Oxford United Kingdom *E-mail*: `a.visser@maths.ox.ac.uk` `Keywords: ` Model theory.
