The New Fantasy Action RPG Review & Interviews by Clec [Interview] ONLINE SYSTEMS AND ONLINE MULTIPLAYER Functionality How was it developing the online systems? It was the most challenging work in the development. Being multiplayer, we have to develop online systems that can match the online gameplay quality. We have to make the best out of a single thread environment that can be adopted to the online gameplay. We created the game structure so that you can enjoy the online elements without feeling any strain. What are the advantages of multiplayer system? Being offline and being online are basically different. Offline games do not have to focus on online systems. It means that there is nothing wrong if a multiplayer system does not work well. On the other hand, we have to develop the online systems that can

fit the fun of playing a multiplayer game. Are there any fears about the size of the online systems? We can reduce the online play time without any problems because we created ‘layers’ that allow the players to enjoy online play comfortably. Was there any problem about the online system? We have some problems, but the problems can be solved. We can make the best out of our situation. Did you have difficulties in creating and developing the online systems? We have the advantage that we can use a single thread environment and we can easily create a single thread environment that can be adopted to the online gameplay. The reason why we use the single thread environment is that we can easily maintain the changes without changing our game environment. We can test and develop the online systems so that the online experience can be completed smoothly. Were there any games that you wanted to look into as an influence? We are inspired by various games. We tried to create online systems that have a lot of social aspects, but we are not influenced by any specific game.

Panisse chef and 2008 Bocuse d'Or recipient Wylie Dufresne is very forthcoming with information on his customers. He is a fan, to be sure. So are most of his customers. David and I were fortunate enough to dine at Chez Panisse in Berkeley, California when Wylie visited two years ago. We enjoyed that meal so much that as soon as we could, David and I booked a trip to Chez Panisse in San Francisco. At Chez Panisse, some of us are also fans

END:VCALENDAR Home has been relocated! Since the renovation and expansion of the administration building in 2006 we have been anxious to move into our new home. In October 2007, the building project was completed. And in June 2008, the administration building officially opened its doors. The new building stands out with its powerful, modern architecture. The 3rd and 4th floor contain 4 meeting rooms, an office, and the boardroom. The 2nd

floor is designated to the library, principal's office, mathematics teacher's office, the media center, and the old administrative building which included the chapel, 3 classrooms, the front office, and the school nurse's office. These rooms are now integrated into the new building. The school is made up of 3 boarding schools: Appenzell, Reformed, and Christian Reformed. The old administration building and the school nurse's office are now our chapel. Over the past 6 months, we have worked hard to ensure that we continue to provide the best possible education for all of you. For this, we need your continued support and prayers.Putin's reaction
