Football has emerged as the most popular sport in the world and the FIFA franchise is the leading sports brand. For nearly 50 years, FIFA has connected millions of fans from around the world. This long-standing legacy is a cornerstone of the brand – and the FIFA franchise remains as beloved as ever. In the new season of innovation, FIFA is ready to take football to the next level. Innovating across the gameplay experience EA SPORTS continues to innovate across the gameplay experience by delivering meaningful gameplay changes and refining key aspects of the FIFA pitch experience, including: Real Player Motion The first FIFA game to feature on-pitch animations in-game. Motion is not only present on the pitch, but in the crowds and in all aspects of the game. Players react to the ball, pass the ball and play off their teammates, all in spectacularly lifelike and realistic fashion. Players also react to each other with on-pitch body language. Referee Disciplinary System Players must now maintain control during free kicks. If a foul is committed inside the penalty area, the referee can award the penalty kick as well as sending off the player. Relaxed Ease-of-Play The next release of FIFA now makes it easier for players to dribble with the ball at any time, more effectively transitioning between cuts and dribbles. Real World Player Traits The next release of FIFA further enhances gameplay by introducing Real World Player Traits. These traits are based on the actual playing styles of more than 40,000 players from all over the world – making it more authentic to the way players play. Incredible Performance New camera cutting motion for free kicks and other shots, and player motion control for passing: Every aspect of football gameplay has been refined to deliver an enhanced, more immersive experience. For example, the Eagerness meter for shooting has been replaced with a new, purer Ease-of-Play gauge to more realistically represent players moving the ball to an optimal location and the effort and strategy required to deliver a scoring shot. Authentic ball physics EA SPORTS implemented a brand new ball model to better match the physics of the ball and to provide for a more realistic experience, as well as new modes of pass creation. Ability to play local multiplayer with new modes FIFA is now more fun to play with friends. Starting with the Skill Games mode, multiple players can now compete against
