Q: How to find the most common number in a sorted list of numbers in a row I have an Excel row like this: a b c 1 1 1 2 2 2 3 3 3 4 4 4 5 5 5 6 6 6 In every row is the same the sum of numbers in columns b and c. What I'd like to do is count the number of times this sum is 3 and print the letter a of the most common number. So, in the row above the answer should be: a, c, a. In row b the answer should be: b, b, b. A: The given linked answer, to get the number of letters by number, would be =ROW(INDEX(A:A,MATCH(1E99,A:A))) - MATCH(1E99,A:A) To get the letter, assuming cells B and C are columns A and B, you can use =VALUE(INDEX(LEFT(\$B:\$B,FIND("-", \$B:\$B)),MATCH(1E99,\$B:\$B))) Put those two into an IF function and you have your desired result. I can do that in a single line =IF(INDEX(LEFT(\$B:\$B,FIND("-", \$B:\$B)),MATCH(1E99,\$B:\$B))=VALUE(INDEX(LEFT(\$B:\$B,FIND("-", \$

B:\$B)),MATCH(1E99,\$B:\$B)),LEFT(B1,FIND("- ",B1)),INDEX(LEFT(\$B:\$B,FIND("- ",\$B:\$B)),MATCH(1E99,\$B:\$B))"a","b") I did not think of the letter "c" and I am assuming that you are looking for the letter which most often appears in your data. If you want to read the most often appearing number in your data, you can use the following one line (thanks to @kastr for suggesting it) =INDEX(LEFT(\$C
