My name is Nikolai Ovchinnikov and I am the one who started all this. In the past I was working on several such games but I decided to stop with this one and concentrate on developing adventure-interactive-incredible apps, which are way more interesting and exiting. I am not a talented writer so you are going to be playing my mind-creations, not my own. The game is about childhood, childhood fears and outbursts of brutality, about poverty, and about children who feel alone and stuck in a bad situation. This is the story of a boy who feels that everything is set the wrong way around and that no one can help him. Chapter One - On my Uncle's farm I play the role of a young boy and experience the terror that befell him 20 years earlier on Halloween. Chapter Two - I play the role of a little girl and see the horror that befell my friend at her Halloween party. Chapter Three - I play the role of an old woman and see the future that awaits me. Chapter Four - A young boy is going to be released from a psychiatric hospital and his life is going to be changed for good.
