I have a Thinkpad x220s running Ubuntu 14.04, with an NVIDIA GeForce 320M (with integrated Intel HD 4000). The problem is that the driver for that card (nvida-driver-304) is causing some strange artifactations, so I would like to replace it with another one (xf86-video-radeon-19.21). How can I install that driver on Ubuntu? Is it possible to install the Nouveau driver?. I have an Intel HD Graphics 4000. I have already installed the latest drivers for my computer, but nothing happens when I press Alt-Shift-PrintScreen-K. The nouveau drivers seem to work fine (I'm using them right now for my dual-monitor configuration), but the Radeon issue I'm having is preventing me from getting a dual-screen setup. A: I'm using a ThinkPad x220s running Ubuntu 14.04 with an NVIDIA GeForce 320M (with integrated Intel HD 4000). It looks like that card is ancient, we no longer recommend those cards for Linux. The newer Intel HD4000 is supported out of the box. How can I install that driver on Ubuntu? Switch to the NVidia proprietary drivers. Select System Settings / Software & Updates / Additional Drivers. Is it possible to install the Nouveau driver? Not yet, but nouveau 3.4 is in the works. We have a developer for the Nouveau project working on the graphics support, it should be available soon. I have already installed the latest drivers for my computer, but nothing happens when I press Alt-Shift-PrintScreen-K. It's not Alt-Shift-PrintScreen-K, that's a BIOS settings. You may want to read that page before complaining. Q: How do I create an ordered list in c#? In my current scenario I need a list which has all the elements in an order specified by the users. I know how to create an orderedlist in c#. What I want to know is there is any way to achieve what I want through which I can add values to it in the specified order without having to use the sort functionality?. Please let me know if I can achieve my desired results in any other way. A: List l = new List(); l.Add
