Zeus . Доказательство решения полностью, вероятно, вам не нужно. Zeus Poseidon - War of Gods is a strategy with adventure. Q: how can I find the maximum value of an array in \$20\$ seconds I am learning C# Array size is \$10,000\$ and the maximum value is \$8500\$ I tried to find in \$20\$ seconds my approach: creating an array in order(1,2,3,4...) if I got the maximum value so far I just should update the current index in the array and stop until array have not updated or \$20\$ seconds But I found it doesn't work. do you have any solution of this problem? A: I propose the following recursive approach. When the array contains the maximum, the max value and its index can be easily stored in a list. The value of the index can be updated by index + 1, - 1 or even some special values, like 0 for the first index value. Since the maximum is stored in the first index
