I created an IDL file using a combination of Common Lisp and Haskell. The file has a header section that specifies a begin and an end. I would like to know if it is possible to refer to the begin and end 'declare' from Haskell. See the following code for an example. -- MyIDL.idl interface { begin MyInterface; end MyInterface; return type ObjectType; } In Common Lisp, the following example is OK (although it requires a specification for each object type): -- CCL version (declaim (ftype (pointer (ObjectType)) ObjectType)) (declaim (ftype (pointer
