This latest free download the site where you can get full cracked version of Sony Music, the very popular music streaming service. Few software appears from any of software aggregation portals top 10 list. It is probably the fact that they are still a new player. For a music player of this size, they have a really sleek looking interface, and I find it quite intuitive to use. Where I see myself using this software is if I want to just hook up a TV and TV show to my computer and listen to my music. I don't want to get into the whole sync thing because that would take time and require me to do some research to figure out which TV doesn't let you add the URL and which ones do. Also, it has support for playing 3D Media so if you do some research you can find out what player you need for your media. So let's not get into the whole sync thing just yet. The fact that you can pick songs off a TV show is great because that means you aren't limited to listening to songs off of your library of music. The only downside of this app is that when it is playing a song, it doesn't have an equalizer. So you can play music on your TV and have the music spit out as the TV is playing a song, or you can get into your music player or Spotify, but you won't be able to have an equalizer. However, it is a really nice app that might be an easy way to get into listening to some of your favorite songs in a whole new way.
