Other improvements: you can now visually identify disk space usage to help you clean up your computer, and protect your privacy and data. Important! Active Boot Disk is a disk-based backup and recovery utility. * The original image created by Active Boot Disk cannot be fully validated. * If the disk checks out ok, it is not guaranteed that the disk corresponds to the state prior to a restore. * Activation or removal of additional software and data may affect the disk validity. * Virtualization may affect the disk validity. * In some rare cases, activation or de-activation of a program may affect the disk validity. * Running Acrobat Reader DC or Acrobat XI Pro changes the image type. * Those disk images have a limited number of use. * The images created by Active Boot Disk are not compatible with traditional disk recovery software, such as Testdisk and Photorec. * There are some restrictions, such as a disk cannot be changed or restored. * There are 10 dark/hidden partitions on the first partition and 100 dark/hidden partitions on the second partition. If the dark/hidden partitions are not needed, the software can be granted for PC piracy. * The dark/hidden partitions may be excluded from the backup by a complex set of conditions, such as hard disk by drive letter.
