October 15, 2018 - Adobe Photoshop CC 2015 is part of Creative Cloud. At the same time, Adobe Creative Cloud 2015 has an update function, and if you do not want to buy a new version, you can go to the settings and select the "do not update" option.I don't know if this is good or not, but, for example, in the old version of Adobe Creative Cloud there is an "Update Management", i.e. You can decide which version to work on. But in the new version of Adobe CreativeCloud there is no "Upgrade Management", and when you upgrade, you will have to search all your old projects, files, pictures, etc..
