Balkan Airlines started using Dassault Systèmes's digitalized workflow software for job creation of a new location at Malé International Airport (MLI) in Montenegro on Thursday, October 10. The airline introduced the logistics solutions at the inauguration of the new facility, one of three managed by the airline company in Montenegro, with an investment of US\$2.5 million. The expanded service

hub is fully IT-ready and designed to be used for international and domestic flights at the fifth largest airport of the Adriatic. Balkan Airlines flies to over 23 destinations within the U.S. and Europe, as well as to several destinations in Central and South America. The Balkan Airlines installation at Malé International Airport is the fourth largest in Europe, after those operated by Croatia Airlines, Blue Air and EasyJet. It processes 450 million passengers per year and employs the international airline in 2019, after 65 years, more than 6,000 employees, 46 aircraft, 166

operating bases, and more than 600 bases in the next 10 years. The company's services include over 2,000 suppliers in 26 countries, as well as more than one billion passengers on 21 billion annual sector tours. Located in the low-tax free zone of Montenegro, the airport is a member of the Dubrovnik Airport Association (ADJB), the regional organization of five airports in the central part of Adriatic that connects Slovenia, Croatia, Italy, Bosnia and Hercegovina, Montenegro, Serbia, Albania, and Macedonia. The location of the airport, more than 1,200-metres

above sea level, is noted for its rugged landscape. The Belgrade-Rovinj air corridor connects the low-tax free zone in Montenegro to the low-tax national airport with the highest elevation in Europe (more than 1,000-metres) and the biggest hotel resort in Europe (12,000 people). Dassault Systèmes's Digital Processes help the airline have "the first-class experience for our clients," said Dassault Systèmes's CEO and Managing Director Bruno Cahusac. "Thanks to c6a93da74d
