KEYMACRO is a software that allows users to define and store all the available keys on your computer. There is no limit to the amount of keystrokes and combinations that can be stored. Besides, the program is also able to list them. Define the keys with the best combinations and modify the quantity of repetitions. You can define the speed of execution for the function that you are defining. With this program you can: Define the keys you use the most; Search for patterns, sequences and strings; Save the set of keys in a file for later use; Categorize the keys according to the context in which they are used; Evaluate the frequency of use of a specific key; Create macros or launch them through an external program; Separate the keys according to the function that they execute. How KEYMACRO works: Keymacro is a program that allows users to save and define all the possible keys used to type the text on a keyboard or program for later use. It also allows you to search for patterns, sequences and strings. Let's say that you want to define the function of the F2 key. Once you open the program you will be able to select it. Once you click on the "Define" button the program will show you the "Key combination" window. The window that will appear will look like this: After you have defined the keys you want to save, you can click on the "Saved settings" button to save them. Using the application you can perform the following actions: Categorize the keys Sort the keys by context Group the keys by function Search for the keys in text files, patterns, sequences and strings. Macro defining Record the keys used Launch the keys via an external program Watch the "Keylist" window Show a list of the keys used "How to Install KEYMACRO": You can download the KEYMACRO from this link Before you can use the program you will need to install it. Here are the instructions: Download the keymacro-x.x.x-Setup.exe Unzip it to any folder and run the.exe Double-click on the shortcut on the desktop Select the folder where you have unzipped the program Follow the instructions on the screen You are done! For more info about KEYMACRO, visit the official website of the program Thanks 2edc1e01e8
