MathChat

MathChat is an attempt to make communication between Math TA's and students that go to Universities and High Schools easier. Users can customize a keyboard so that chatting using standard text and math formulas is easy and intuitive for anyone. The interface is very simple. A user just need to select the source and destination address of the communication and enter a message. MathChat Features: MathChat is free and simple to use and does not need any registration. It is not a project but a software that I think is very useful and that I'm going to continue to develop and make available to the public. MathChat News MathChat 2.0 is out. It includes a voice chat and improved highlighting. MathChat 3.0 is currently under development and contains voice chat, a customizable text mode and adding and removing contacts from groups. The open source version of MathChat (MathChat-OS) is released. It contains a version of MathChat modified to be easily customizable for other uses and to be used on computers with other operating systems. Installation MathChat-OS installation From the folder with your download, run the install.sh script and follow the instructions in the script. From the folder with your download, run the setup.sh script and follow the instructions in the script. MathChat Beta 2 installation From the folder with your download, run the install.sh script and follow the instructions in the script. From the folder with your download, run the setup sh script and follow the instructions in the script. MathChat Beta 3 installation From the folder with your download, run the install.sh script and follow the instructions in the script. From the folder with your download, run the setup.sh script and follow the instructions in the script. MathChat OS installation From the folder with your download, run the setup.sh script and follow the instructions in the script. Addons installation The addons can be downloaded from the site using the addons links above. The addons are available to install directly from inside the repository from which you downloaded MathChat. Usage Basic Usage Create a group of friends. Use chat groups. Send a message to the group. Enter a message. Highlight the message. Send the message to the
