Once the installation is complete, you need to locate the patch file and copy it to your computer. Then, launch the software and run the patch file. Once the patching process is complete, you will have a fully functional version of Photoshop. To make sure that the software is running properly, you need to check the version number and see if its cracked.

Another new feature is live curves. Like it's version in CS6, this allows you to zoom in, and curves work on the image you're zooming in on. With the new curves tools, you can make a variety of adjustments to colors in a way that's easy on your eyes. Adobe's Release notes for Photoshop CC show it to be a major update, with a number of big changes to the following areas:

Adobe Camera Raw

The new Adjustment Layers, in the World Class Explorer, allow for quick adjustment to color and exposure. This makes their utility much more powerful. The rollout is gradual, and you can still make adjustments by using the Layers panel.

Adobe Smart Sharpen

It's even easier to utilize adjustment layers (adjusts: Color, Exposure, Blacks, Whites, Shadows, Highlights, and Opacity) to create various looks. It also works surprisingly well both on the web and in Photoshop.

More granular editing of individual colors and textures.

The new Features and Points tool is a nice way to quickly select and adjust a range of pixels and gives you the option to change their appearance.

Advanced menuing now available throughout the movie tools. Overall this makes the workflow easier for people who use presets.

Video editing now has a workflow system that allows for both a simple editing workflow as well as a way to process raw footage from a laptop. The new tools should make both ways of editing video simple, even if the user doesn't have experience creating edited movies.

The Connect panel is smartly named, and allows for easy marker placement, which can enable editing on images without any mark-up. Using the Smart Objects you can easily create a "smart mark-up" and set up a pattern for multiple images.

The Download All panel is extremely helpful, and can group multiple images and be downloaded to your computer as a zip file.

In the Free Form Lasso you can customize the lasso selection and adjust the selection's size and shape.
